# Where is **Aruba**

You must be familiar with the island's location **before you travel here.**

Aruba is a small island country situated in the southern Caribbean Sea, about 15 miles north of the coast of Venezuela.

**It enjoys a warm, sunny climate all-year-round** with relatively low risk of tropical storms. It is a very popular tropical getaway with **beautiful beaches, outdoor activities, and a vibrant culture.**

# Best season to come to Aruba

Aruba has a tropical climate with consistent warm temperatures year-round, **so there isn't really a bad time to visit.** However, the dry season (mid January through May) is considered the best time to visit the island. The weather is sunny and warm with low humidity and very little rainfall.
